Subject Index of Volume 27

Acetone solution
adsorption of β-carotene from, on natural and chemically modified bentonite, 307
Adhesion
effect of pretreatment parameters on, of high performance multilayer thin films on modified polypropylene, 251
Adsorbents
silica: hydrothermal modification of porous structure of, 189
Adsorption
of β-carotene from acetone solution on natural and chemically modified bentonite, 307
Adsorption properties
effect of doping agents and of crystallographic phase on, of titania-supported Rh, 181
Aging
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
Alloy
solidification of Cu–Rh, single crystals, 225
Aluminium
Al_2O_3–SnO_2 systems as support for metallic catalysts:
porous structure, 129
preparation and structure, 117
conductive and transparent Al-doped thin films prepared by RF magnetron sputtering, 427
Amorphous state
existence of two magnetic phases within, of $Co_{72.8}Fe_{5.2}Si_{11}B_{11}$ ribbon, 393
Anodes
for preparation of EMD and application of manganese dioxide coated anodes for electrochemicals, 337
Arsenic
luminescence in $KTiOPO_4$ structure field: $KTiOAsO_4$ and $KSnOPO_4$, 279
Bentonite
adsorption of β-carotene from acetone solution on natural and chemically modified bentonite, 307
Bismuth
influence of preparative conditions on Tc of superconducting $Bi_2SrCa_2Cu_2O_8$, 69
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
Boron
existence of two magnetic phases within amorphous state of $Co_{72.8}Fe_{5.2}Si_{11}B_{11}$ ribbon, 393

Caesium
thermoluminescence and thermoluminescence emission of γ-irradiated CrO_4^{2-}-doped CsBr, 213
Calcium
influence of preparative conditions on Tc of superconducting $Bi_2SrCa_2Cu_2O_8$, 69
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
phase equilibria in system Y_2O_3–CaO–P_2O_5: partial system YPO_4–$Ca_2P_2O_7$–$Y_2P_4O_{13}$, 419
phase equilibria in system Y_2O_3–CuO–CaO below 950 °C, 375
Carbon
effect of thermal pretreatment on structural properties of Fe/MgO catalysts in hydrocarbon synthesis from CO and H_2, 403
spectroscopic studies of carbon:
IR study of charring of coconut shell, 359
pyrolysis of polyvinylidene chloride and of saran, 155
Carotene
β-; adsorption of, from acetone solution on natural and chemically modified bentonite, 307

Elsevier Sequoia, Lausanne

Catalysts
Al_2O_3–SnO_2 systems as support metallic catalysts:
porous structure, 129
preparation and structure, 117
effect of thermal pretreatment on structural properties of Fe/MgO catalysts in hydrocarbon synthesis from CO and H_2, 403
Charring
IR study of, of coconut shell: spectroscopic studies of carbon, 359
Chemical deposition
of metal chalcogenide thin films, 1
Chromium
thermoluminescence and thermoluminescence emission of γ-irradiated CrO_4^{2-}-doped CsBr, 213
Cobalt
existence of two magnetic phases within amorphous state of $Co_{72.8}Fe_{5.2}Si_{11}B_{11}$ ribbon, 393
O_2 evolution in 30 wt.% KOH at 70 °C on Ni electrocoated with, 235
preparation of homogeneous Zn/Co mixed oxides by spray pyrolysis, 287
Coconut shell
IR study of charring of; spectroscopic studies of carbon, 359
Copper
anion effect of morphology and preferred orientation of Cu deposit under pulse current conditions, 77
ice nucleation of AgI–CuBr nucleants in presence of electric field, 385
influence of preparative conditions on Tc of superconducting $Bi_2SrCa_2Cu_2O_8$, 69
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
phase equilibria in system Y_2O_3–CuO–CaO below 950 °C, 375
solidification of Cu–Rh alloy single crystals, 225
Crystallographic phase
and doping agents: effect of, on adsorption properties of titania-supported Rh, 181
Crystals
effect of plastic deformation on thermally stimulated luminescence of NaCl:Y crystals, 325
solidification of Cu–Rh alloy single crystals, 225

Doping
agents and crystallographic phase: effect of, on adsorption properties of titania-supported Rh, 181
conductive and transparent Al-doped thin films prepared by RF magnetron sputtering, 427
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
thermoluminescence and thermoluminescence emission of γ-irradiated CrO_4^{2-}-doped CsBr, 213

Electrocoating
O_2 evolution in 30 wt.% KOH at 70 °C on Ni electrocoated with Co, 235
Electrodeposition
of Sm from tartrate bath, 265
Electrodes
anodes for preparation of EMD and application of manganese dioxide coated anodes for electrochemicals, 337
characterisation of Mo Ti composite oxide electrodes, 351
EMD
anodes for preparation of, and application of manganese dioxide coated anodes for electrochemicals, 337

Films
chemical deposition of metal chalcogenide thin films, 1
conductive and transparent Al-doped thin films prepared by RF magnetron sputtering, 427
effect of pretreatment parameters on adhesion of high performance multilayer thin films on modified polypropylene, 251
solution growth of silver sulphide thin films, 321
spray/CVD deposition and characterisation of surface modified zinc oxide thick films for gas sensor, 45

Gas sensor
spray/CVD deposition and characterisation of surface modified zinc oxide thick films for, 45

Hydrocarbon synthesis
effect of thermal pretreatment on structural properties of Fe/MgO catalysts in, from CO and H_2, 403
Hydrothermal modification
of porous structure of silica adsorbents, 189

Ice nucleation
of AgI–CuBr nucleants in presence of electric field, 385
Iron
effect of thermal pretreatment on structural properties of Fe/MgO catalysts in hydrocarbon synthesis from CO and H_2, 403
existence of two magnetic phases within amorphous state of $Co_{72.8}Fe_{5.2}Si_{11}B_{11}$ ribbon, 393
Irradiation
thermoluminescence and thermoluminescence emission of γ-irradiated CrO_4^{2-}-doped CsBr, 213

Lanthanum
system $LaPO_4$–KPO_3–$La(PO_3)_3$, 109
Lead
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
Luminescence
in $KTiOPO_4$ structure field: $KTiOAsO_4$ and $KSnOPO_4$, 279
thermally stimulated; effect of plastic deformation on, of NaCl:Y crystals, 325
thermoluminescence and thermoluminescence emission of γ-irradiated CrO_4^{2-}-doped CsBr, 213

Magnesium
effect of thermal pretreatment on structural properties of Fe/MgO catalysts in hydrocarbon synthesis from CO and H_2, 403
Magnetic phase
existence of two magnetic phases within amorphous state of $Co_{72.8}Fe_{5.2}Si_{11}B_{11}$ ribbon, 393
Manganese dioxide
anodes for preparation of EMD and application of manganese dioxide coated anodes for electrochemicals, 337
Metal chalcogenide
thin films; chemical deposition of, 1
Molybdenum
characterisation of Mo Ti composite oxide electrodes, 351
Morphology
and preferred orientation of Cu deposit under pulse current conditions; anion effect of, 77

Nickel
characterisation of electroless Ni by ESCA, 141
O_2 evolution in 30 wt.% KOH at 70 °C on Ni electrocoated with Co, 235

Oxygen evolution
in 30 wt.% KOH at 70 °C on Ni electrocoated with Co, 235

Phosphorus
luminescence in $KTiOPO_4$ structure field: $KTiOAsO_4$ and $KSnOPO_4$, 279
phase equilibria in system Y_2O_3–CaO–P_2O_5: partial system YPO_4–$Ca_2P_2O_7$–$Y_2P_4O_{13}$, 419
phase equilibria in system YPO_4–$K_4P_2O_7$, 217
phase equilibria in system YPO_4–K_3PO_4–$K_4P_2O_7$, 331
system $LaPO_4$–KPO_3–$La(PO_3)_3$, 109
Plastic deformation
effect of, on thermally stimulated luminescence of NaCl:Y crystals, 325
Polypropylene
modified; effect of pretreatment parameters on adhesion of high performance multilayer thin films on, 251
Polyvinylidene chloride
and saran: pyrolysis of; spectroscopic studies of carbon, 155
Porous structure
Al_2O_3–SnO_2 systems as support for metallic catalysts, 129
hydrothermal modification of, of silica adsorbents, 189
Positron affinity
in (III-V) semiconductors, 61
Positron trapping
in some metals, 55

Potassium
luminescence in $KTiOPO_4$ structure field: $KTiOAsO_4$ and $KSnOPO_4$, 279
phase equilibria in system YPO_4–$K_4P_2O_7$, 217
phase equilibria in system YPO_4–K_3PO_4–$K_4P_2O_7$, 331
system $LaPO_4$–KPO_3–$La(PO_3)_3$, 109
Pulse current conditions
anion effect of morphology and preferred orientation of Cu deposit under, 77
Pyrolysis
of polyvinylidene chloride and of saran: spectroscopic studies of carbon, 155
spray; preparation of homogeneous Zn/Co mixed oxides by, 287

Quenching
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297

RF magnetron sputtering
conductive and transparent Al-doped thin films prepared by, 427
Rhodium
effect of doping agents and of crystallographic phase on adsorption properties of titania-supported Rh, 181
solidification of Cu–Rh alloy single crystals, 225

Samarium
electrodeposition of, from tartrate bath, 265
Saran
and polyvinylidene chloride: pyrolysis of; spectroscopic studies of carbon, 155
Semiconductors
(III-V); positron affinity in, 61
Silicon
existence of two magnetic phases within amorphous state of $Co_{72.8}Fe_{5.2}Si_{11}B_{11}$ ribbon, 393
hydrothermal modification of porous structure of silica adsorbents, 189
Silver
ice nucleation of AgI–CuBr nucleants in presence of electric field, 385
solution growth of silver sulphide thin films, 321
Sodium
effect of plastic deformation on thermally stimulated luminescence of NaCl:Y crystals, 325
Spectroscopy
characterisation of electroless Ni by ESCA, 141
spectroscopic studies of carbon:
IR study of charring of coconut shell, 359
pyrolysis of polyvinylidene chloride and of saran, 155
Spray/CVD deposition
and characterisation of surface modified zinc oxide thick films for gas sensor, 45
Spray pyrolysis
preparation of homogeneous Zn/Co mixed oxides by, 287
Sputtering
RF magnetron; conductive and transparent Al-doped thin films prepared by, 427
Strontium
influence of preparative conditions on Tc of superconducting $Bi_2SrCa_2Cu_2O_8$, 69
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
Structural properties
effect of thermal pretreatment on, of Fe/MgO catalysts in hydrocarbon synthesis from CO and H_2, 403
Superconductors
influence of preparative conditions on Tc of superconducting $Bi_2SrCa_2Cu_2O_8$, 69
influence of reaction time, quenching and room aging in Pb-doped Bi–Ca–Sr–Cu–O high temperature superconductors, 297
Surfaces
spray/CVD deposition and characterisation of surface modified zinc oxide thick film for gas sensor, 45

Tartrate bath
electrodeposition of Sm from, 265
Thermal pretreatment
effect of, on structural properties of Fe/MgO catalysts in hydrocarbon synthesis from CO and H_2, 403

Thermoluminescence
and thermoluminescence emission of γ-irradiated CrO_4^{2-}-doped CsBr, 213
Tin
Al_2O_3–SnO_2 systems as support for metallic catalysts:
porous structure, 129
preparation and structure, 117
luminescence in $KTiOPO_4$ structure field: $KTiOAsO_4$ and $KSnOPO_4$, 279
Titanium
characterisation of Mo Ti composite oxide electrodes, 351
effect of doping agents and of crystallographic phase on adsorption properties of titania-supported Rh, 181
luminescence in $KTiOPO_4$ structure field: $KTiOAsO_4$ and $KSnOPO_4$, 279
Yttrium
effect of plastic deformation on thermally stimulated luminescence of NaCl:Y crystals, 325
phase equilibria in system:
Y_2O_3–CaO–P_2O_5: partial system YPO_4–$Ca_2P_2O_7$–$Y_2P_4O_{13}$, 419
Y_2O_3–CuO–CaO below 950 °C, 375
YPO_4–$K_4P_2O_7$, 217
YPO_4–K_3PO_4–$K_4P_2O_7$, 331

Zinc
conductive and transparent Al-doped thin films prepared by RF magnetron sputtering, 427
preparation of homogeneous Zn/Co mixed oxides by spray pyrolysis, 287
spray/CVD deposition and characterisation of surface modified zinc oxide thin films for gas sensor, 45
